Years
Warranty

Sandberg Wireless Headset BatterySwap is a wireless stereo headset built for long workdays without interruptions. When the battery runs low, simply swap it for the included spare battery pack — no waiting to charge. The dual ENC microphone reduces background noise and ensures clear speech, while the 270° rotating microphone boom and mute button give you quick control during calls. The headset connects easily via a USB dongle. Soft ear cushions make the headset comfortable to wear all day. The foldable charging base makes it easy to charge, and together with the foldable earcups, both are easy to store and carry in the included protective pouch.
