

Sandberg CyberMic

The Sandberg CyberMic is the perfect choice when you need to record your voice on your computer, e.g. for Internet telephony or for talking with other players during network gaming. You can adjust the sensitivity of your Sandberg CyberMic so that it can be used for recording both close to and further away from the audio source. The mute button allows you to disable the microphone when you need to conduct a private conversation that you do not want to record. The trendy design of the Sandberg CyberMic will enhance any computer environment.
