Sandberg SATA RAID Boost

Optional Low Profile bracket included

Double Quality Tested

RoHS COMPLIANT

5 YEARS WARRANTY
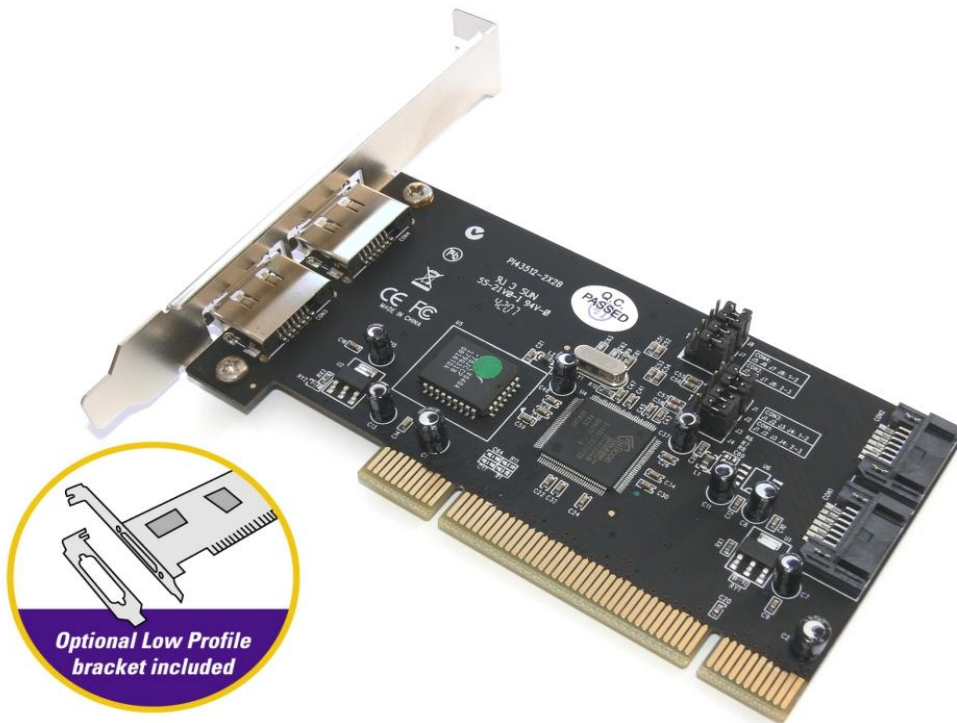

The Sandberg SATA Raid Boost lets you expand your computer with up to two internal SATA hard disks, either individually or in a RAID configuration. You can also use the two external eSATA ports to connect eSATA devices such as an external hard disk.

S.L.A.P. (Dansk eSport) tested the Sandberg Serial ATA RAID Boost (30/05/2007 issue). The review mentioned:

"... Quite a reasonable price for secure backup... Enables several SATA hard disks to be connected... If you are a backup freak or have your own small business, the Mirror RAID feature is another factor in making the card good value for money..."
