Sandberg®

Double Quality Tested

RoHS COMPLIANT

5 YEARS WARRANTY

The Sandberg USB 2.0+FireWire Boost expands your computer with six new ports, and yet only takes up a single PCI slot. It provides two FireWire (IEEE 1394) ports and four Hi-Speed USB 2.0 ports, one of which is internal. It enables you to connect a wide range of high-speed peripherals, such as hard disks, webcams and DV cameras. The Hi-Speed USB 2.0 ports are backwards compatible, so you can also connect Full-Speed USB 1.1 standard devices, e.g. printers and modems. A convenient solution for devices old and new!
