

Sandberg USB 3.0 Boost PCI Express

The Sandberg USB 3.0 Boost PCI-E enables you to upgrade your PC to operate the high-speed USB 3.0 standard. Simply insert the card into an available PCI-E port inside your computer, and then you can connect USB 3.0 devices to the card's USB 3.0 ports. You can then transfer data at speeds of up to an impressive 5 Gbit/sec, equivalent to 10 times faster than the previous USB 2.0 standard. It is still possible to connect USB 1.1 and USB 2.0 devices to the card.
