

With the Sandberg USB 2.0 to Hard Disk Link you can use a standard 2.5" hard disk as an external hard disk. Insert the hard disk into the Sandberg USB 2.0 to Hard Disk Link, which you connect to the USB port in your computer using a USB cable, and a new drive will appear. The Sandberg USB 2.0 to Hard Disk Link functions with both the USB 1.1 Full-Speed and the super-fast USB 2.0 Hi-Speed. The Sandberg USB 2.0 to Hard Disk Link does not require a power supply from an electric socket, so you can use it with your laptop when you are on the road. The accompanying carrying case and its compact size ensure easy data transport in your pocket or bag.
