

Sandberg USB DigiTV

You can use Sandberg USB DigiTV to watch digital TV on your computer anywhere there is a digital TV signal. This means your system is future proof, because the TV transmission network is changing over to digital TV for much better picture quality than the old analogue standard. A remote control is included to make it easy and convenient to use your computer as a digital TV. The software supplied with the package provides a range of great functions like teletext, electronic programme guide (EPG) and timeshifting. English manual.
