

## Sandberg USB 2.0 to SATA Link

The Sandberg USB 2.0 to SATA Link enables you to use a SATA 3.5" hard disk as an external hard disk. The hard disk can be easily inserted into the Sandberg USB 2.0 to SATA Link, which connects to your computer either via USB 2.0 or eSATA. If your computer doesn't already have eSATA, you can use the enclosed bracket to convert an internal SATA connector to an eSATA connector. The hard disk is cooled by a small fan to optimise performance. English user guide.

Interface: USB 2.0 + eSATA  
USB specification: USB 2.0 backward compatible with USB 1.1  
SATA specification: SATA I and SATA II  
Heat Dissipation Design: 4 cm cooling fan with back-panel ventilator hole  
Material: Aluminum cover; Plastic frame  
HDD Support: 3.5" SATA I / SATA II  
External connectors: 1 USB B female, 1 eSATA female, 1 Power Jack female  
Internal connectors: SATA connectors for data and power connections
