

## Sandberg Fingerprint Hard Disk Box 2.5

The Sandberg Fingerprint Hard Disk Box is a unique way of ensuring that only you have access to your personal data and sensitive information. It is easy to fit a 2.5" SATA hard disk in the box, and the box connects to your computer via a USB cable. Using the software provided, you can decide how much of the hard disk is to be protected with fingerprint verification (partitioned). Should any unauthorised users get hold of the box, they will be unable to access your data held on this part of the hard disk. The box is also compact and handy to keep with you. Another feature is that with just a push of a button on the box you can back up selected folders and files.

The British magazine PC Utilities has reviewed the Sandberg Fingerprint Hard Disk Box (Issue 111). They said:

*"...If your drive should become lost or stolen, you can rest easy in the knowledge that no one will be able to get at your sensitive files...it's an interesting idea which will appeal to security conscious users..."*
