

Sandberg PC>Scart audio+video IN+OUT 5m

This 5-metre multi-cable attaches to the Scart socket on your television or video. At the other end are two sets of composite video and stereo connectors that can be connected to your computer. One set is INPUT, the other is OUTPUT. The composite video signals use a male phono jack, while the stereo signals use a male mini jack. A smart cable with a wide range of applications, e.g. together with a graphics card that has both TV Out and frame grabber functionality.
