

Sandberg USB Mini Mouse

Sandberg USB Mini Mouse is a perfect little helper for your laptop as it is much faster to work with than the laptop's integrated pointing device. The mouse barely takes up any space in your bag and the retractable USB cable means you don't have any cable clutter. Contrary to more expensive wireless alternatives, you are guaranteed never to run out of power with this cabled mouse. You thus also avoid the hassle and expense of replacing batteries. The mouse is also suitable for children's small hands.
