

Just like any other wireless mouse, Sandberg Wireless Battery-Free Mouse pro gives you full freedom of movement without an annoying cable in the mouse. But this mouse is different from the rest. It runs without batteries! This means you are completely free from annoying battery changes which are both time-consuming and cost money as well as causing damage to the environment. The secret is the mouse mat from which the mouse draws electricity via electromagnetic induction through the computer's USB port. The mouse's optical controls ensure optimal precision and the two scroll wheels allow you to scroll both vertically and horizontally. Software is also included in which you can programme the mouse's buttons and fine-tune movement. English user guide.
