

Sandberg 2in1 Numeric Mouse

Make it easier to work with your laptop. The Sandberg 2in1 Numeric Mouse is a numeric keypad and an optical mouse combined in a single, handy unit that's easy to carry around. Simply connect it to a USB port and it will work without the need to install drivers. The mouse sits perfectly in your hand, and you can lock the keys if you want to use only the mouse function, and vice versa.

The British magazine PC Utilities has reviewed the Sandberg 2in1 Numeric Mouse (Issue 112). They said:

"...all the functions Excel users could want at their fingertips...this is a handy, space-saving gadget..."
